

WOODSTRANSFERS.COM
ARTWORK GUIDELINES

NOTE - We are unable to print half-tones (photos) or images that contain gradients (shading) or drop shadows. Screen printing is for spot colours only.

Vector Art Files -

CorelDraw (.cdr) or Adobe Illustrator (.ai)

If you are using fonts, make sure to convert to curves/outlines.

Acceptable Image Files -

The following file formats must be high-resolution (300 dpi) and sized close to the final image size for printing.

.tif | .psd (Photoshop) | .eps | .pdf

Beware of jpegs! -

High quality jpegs do exist, but they are rare. In short, most jpegs, especially those scraped from the internet, just won't produce an acceptable result.

Our "Art" charges -

Good quality images with layouts complete - **NO CHARGE**

Simple layouts from your supplied images - **\$10**

Complex Layouts from your supplied images - **\$20**

Re-draws and creative art - **ask for a quote**

Do I Need Adhesive? -

Be aware of very fine lines or thin outlines - they can be problematic. Typically outlines on large prints reduced to a very small size can simply be too thin for an acceptable result.

Adding adhesive can help with this.
